💼 WORK EXPERIENCE

Microsoft
Customer Engineer

July 2019 – Present   *London, UK*

- ❑ Delivered training and services to end customers, focusing on cloud technologies as well as troubleshooting, strategy and best practices.
- ❑ Worked with customers to plan, deploy, operate and optimize their modern cloud applications and helped them in accomplishing their business needs.
- ❑ Synthesized customer feedback to facilitate continuous product/services improvement in close co-operation with Product/Engineering teams.
- ❑ Bring in the best minds to the organization via interviews conducted across the country.

Consultant

Jan 2016 – July 2019   *Hyderabad, India*

- ❑ Lead the database team for a $42M auditing application developed for one of the leading audits, tax and advisory firm in London.
- ❑ Improved SQL Database performance, which brought down the resource consumption cost from $16k /month to $3.6k /month.
- ❑ Designed a methodology of continuous migration which ensures the schema changes made post-production release is appropriately versioned and continuously migrated with daily builds.

Aon Hewitt
Software Executive

Aug 2015 – Jan 2016   *Gurgaon, India*

- ❑ Developed a web application 'Hewitt Gateway' with a team of 50+ distributed across the globe.
- ❑ Lead the activity of migration of applications from Windows Server 2003 to Windows Server 2008.

Icertis
Software Analyst

Aug 2012 – Jul 2015   *Pune, India*

- ❑ Responsibilities included gathering customer requirement, architecting, developing and delivering solutions
- ❑ Design, develop and deliver a web application 'Retail process automation', which streamlines the process of opening Microsoft stores.
